

## 2 C

- 1.) Describe what happens when a volcano erupts by sorting the boxes below into the correct order. Link your boxes with arrows and add a title.

---

lava pours down the  
mountainside

magma rises from over  
50 km inside the earth

magma climbs up the vent  
and reaches the crater

volcano gently rumbles  
and steams

loud explosion as volcano  
erupts

ash, bombs and lava  
blasted out of the  
volcano
