

Mount Etna erupts

You are a reporter for a national newspaper. News has just come in that Mount Etna has erupted. Your editor has given you the front page to report the event. You can use either the page layout shown below or one of your own design. You could use a computer to help make your page look more professional.

Your report will look best on a double page in your exercise book or on a large piece of paper to be displayed in the classroom.

Front page design layout

The template is titled "Front page design layout" and is enclosed in a rectangular border. At the top, it says "Make up your own newspaper name" with an arrow pointing to "DAILY GLOBE" in large, bold, outlined letters. To the right of "GLOBE" is a globe icon and the word "DATE" in a box. An arrow points to the "DATE" box with the text "This will be when the eruption happened". Below the masthead is a horizontal line. On the left side, there is a large section labeled "BIG HEADLINE" in bold, followed by several horizontal lines for text. An arrow points to this section with the text "To attract people to your story". To the right of the "BIG HEADLINE" section is a "Map of area" showing a geographical region with a volcano icon. Below the map is a "Simple drawing to show eruption or damage done" depicting a volcano erupting with buildings nearby. Below the drawing is a "Small headline" followed by several horizontal lines for text. An arrow points to this section with the text "To introduce your article on causes of eruptions". At the bottom left is a "Labelled diagram to show how a volcano erupts" showing a cross-section of a volcano with magma rising from the center. An arrow points to this diagram with the text "Labelled diagram to show how a volcano erupts". At the bottom right, there are several horizontal lines for text, with an arrow pointing to them and the text "Description of how a volcano erupts".
